Your Mission, Our Commitment.

For over three decades, Fliteline has been the aviation partner our clients turn to when standard solutions simply won't work. Founded in 1994 by genuine aviation enthusiasts in the heart of European aviation, we've built our reputation one successful journey at a time turning complex challenges into seamless pathways forward.

Our story isn't just about experience; it's about the relationships we've built and the trust we've earned. When we joined the Rhenus Group in 2007, we gained world-class resources whilst keeping the personal, solution-focused approach that makes us different. We're not just processing requests, we're solving problems alongside people who genuinely understand aviation.

When our clients call with what seems impossible, we see it as an opportunity to find a pathway that works. That's not just our promise, it's what gets us excited about aviation.

Our Mission: Opening Pathways

We're aviation specialists who find solutions where others see obstacles. Whether connecting urgent cargo deliveries, coordinating family travel, or managing complex group logistics, we create pathways through aviation's challenges. Our mission is connecting people, cargo, and critical missions with exactly the right aircraft, delivered with the genuine expertise that only true aviation enthusiasts provide.

Aviation Expertise You Can Trust:

We specialise in aviation solutions, bringing honest guidance and efficient coordination processes. Our team offers deep industry knowledge that helps you make informed decisions at every stage.

Dependable Partnership:

When timing matters most, we're partners who understand the stakes. Our clients depend on us for thorough planning, proactive communication, and operational precision that keeps complex missions on track.

Solution-Focused Approach:

We listen carefully to understand your requirements, then apply aviation knowledge to create pathways that work. We have proven experience turning challenging requests into successful operations.

Genuine Commitment:

Your mission becomes our mission. From initial enquiry through delivery, we coordinate every detail with the care and expertise you expect from partners who understand aviation and your priorities.

The Strength of a Global Network

For over 30 years, Fliteline has built something rather special in aviation brokerage: genuine partnerships that create pathways where others see obstacles. Since joining the Rhenus Group in 2007, we've maintained our independent, solution-focused approach whilst gaining access to operational capabilities that transform how we serve complex missions.

Our connection with Rhenus Logistics represents more than corporate structure; it's about enhanced capability. While we remain the same aviation specialists our clients trust, this partnership amplifies what we can achieve together.

Operational Synergy: Rhenus Logistics

Our relationship with Rhenus Logistics, a leading subsidiary within our parent group, creates distinct advantages that benefit every client operation:

Global Infrastructure

Rhenus's network spanning 970+ locations worldwide with deep local expertise means we can coordinate ground operations, customs clearance, and logistics support virtually anywhere your mission takes you. This proves particularly valuable for challenging cargo deliveries and remote location operations.

Integrated Solutions

When your requirements extend beyond aviation, our Rhenus connection provides expertise across road, rail, and ocean transport. This means seamless coordination for clients needing comprehensive logistics solutions, from initial pickup through final delivery.

Operational Intelligence

Access to Rhenus's extensive market intelligence and regulatory expertise across multiple transport modes helps us anticipate challenges, optimise routing decisions, and provide more informed recommendations for complex international operations.

Partnership That Works

This strategic relationship allows Fliteline to remain agile and personally focused whilst drawing upon decades of logistics expertise and global operational knowledge. We're still the aviation enthusiasts you trust, now with even better tools to solve your most complex challenges.

We don't just arrange flights—we create pathways through aviation's complexities, ensuring your most important journeys succeed exactly as planned.

Why Leading Organisations Choose Fliteline:

Specialist Service, Global Power: Experience the agility, personal attention, and bespoke service of a dedicated charter specialist, amplified by the unparalleled resources and financial stability of the RETHMANN Group. This unique combination offers you the best of both worlds – expert focus with global reach.

Aviation Specialists, Global Reach:

Experience the focused expertise and personal attention of dedicated charter specialists, supported by the operational strength and stability of the Rhenus Group. This partnership gives you specialist aviation knowledge with the resources to handle complex international operations.

Three Decades of Expertise:

Experience the focused expertise and personal attention of dedicated charter specialists, supported by the operational strength and stability of the Rhenus Group. This partnership gives you specialist aviation knowledge with the resources to handle complex international operations.

Our Approach: Clarity at Every Step

1 Initial Consultation:

We begin with a thorough discussion to understand your objectives, timeline, and specific requirements. Our team listens carefully to capture every detail that might affect your journey's success.

2 Solution Development:

We analyse requirements and develop tailored recommendations using aviation expertise and operator relationships. Receive clear options with transparent explanations of how each approach meets needs.

3 Coordination Planning:

We handle all operational details, from aircraft selection through ground arrangements and regulatory requirements. Every aspect is planned thoroughly with contingencies prepared for potential complications.

4 Journey Management:

We provide proactive communication throughout your operation, monitoring progress and addressing any changes immediately. You stay informed whilst we handle the complexities behind successful execution.

A Complete Portfolio of Charter Services

Whatever your requirements, wherever you need to go

Private Charter

Your time matters, and we understand exactly how much. We create the control, privacy, and efficiency you need by coordinating journeys that work around your schedule, not airline timetables. Drawing on our global network of aircraft operators, we handle every detail with complete discretion and the flexibility to adapt when plans change, ensuring your travel works exactly as you need it to.

Group Charter

We specialise in turning complex group logistics into smooth operations that bring teams together successfully. Whether coordinating corporate events, sports teams, or workforce movements, we manage every aspect of your charter so your group arrives together, on time, and ready for what matters next. Our experience covers everything from conferences and specialist group travel to efficient team logistics worldwide.

Cargo Charter

When timing is everything, we deliver. We specialise in moving time-critical, high-value, and oversized cargo with the precision and care these shipments deserve. Our deep understanding of global logistics ensures your most important deliveries—from Aircraft on Ground (AOG) parts and automotive components to sensitive project cargo—reach their destination safely and on schedule, with specialist handling and fully compliant transport.

ACMI Leasing

We provide aircraft leasing solutions for airlines and operators who need flexible capacity when they need it most. Our market knowledge and operator relationships help us source the right aircraft, crew, maintenance, and insurance (ACMI) packages for your specific operational requirements, whether covering maintenance periods, launching new routes, handling AOG situations, or managing seasonal demand variations.

From midnight medical evacuations to complex diplomatic movements, our aviation specialists create pathways where others encounter roadblocks. When regulations seem impossible to navigate, we find the route forward. This expertise serves every client journey.

Trust Through Transparency and Proven Standards

Trust isn't something you can simply claim, it's something you earn through consistent actions and transparent practices. We understand that when you're coordinating charter operations, particularly for sensitive missions or valuable cargo, security and compliance aren't optional extras. They're fundamental requirements that we build into every aspect of our service.

Our approach to safety and security is straightforward: we work with operators we trust, follow regulations we understand, and maintain standards that give you genuine peace of mind.

Our Foundation of Reliable Operations

Careful Operator Selection

We've built relationships with aircraft operators who share our commitment to safety and professional standards. Rather than working with anyone who has an available aircraft, we partner with operators whose certifications, track records, and operational approaches align with what we'd expect for our own families' travel.

Regulatory Guidance

International aviation regulations change frequently, and navigating this complexity can be overwhelming. Our team stays current with these requirements because we understand that proper compliance protects your operations. From overflight permits to crew duty limitations, we coordinate the regulatory aspects for you.

Proactive Journey Oversight

Our operations team provides continuous oversight on every charter, proactively monitoring flight progress, weather conditions, and potential operational challenges whilst maintaining communication with crew and ground services to ensure smooth operations.

Complete Discretion

We maintain the highest standards of data security and operational discretion. Your travel details, cargo manifests, and operational requirements are handled with complete confidentiality throughout our partnership.

“When others see impossible situations, we see aviation challenges that require careful coordination and genuine expertise. The same thoughtful approach we bring to every charter works especially well when circumstances are most demanding.”

Capability in the Most Critical Conditions

Our expertise shows most clearly not in routine operations, but in those moments when everything depends on getting it right the first time. We’ve spent years building the relationships, knowledge, and operational capabilities that make the difference when standard solutions simply won’t work. Whether it’s navigating complex international regulations or coordinating multi-agency responses, we approach high-stakes missions with the same careful attention we bring to every charter.

Proven Expertise in Demanding Operations:

Crisis Response

We coordinate urgent airlifts of life-saving supplies, medical equipment, and response teams to disaster zones worldwide, including earthquake regions, hurricane-affected areas, and tsunami response operations where timing can mean the difference between life and death.

Emergency Evacuations

When political situations deteriorate or natural disasters threaten safety, we provide rapid, secure charter solutions to evacuate personnel, citizens, and families from affected regions, coordinating with multiple agencies whilst maintaining operational security throughout.

Diplomatic Missions

Government agencies trust us to handle sensitive flights requiring absolute confidentiality and operational precision, navigating complex international protocols and security requirements whilst maintaining the careful discretion these operations demand throughout.

Corporate Crisis

We support companies facing urgent operational challenges, from evacuating employees from unstable regions to rushing critical equipment to remote locations, coordinating complex logistics when business continuity depends on rapid, reliable aviation solutions.

Knowledge That Creates Value

Aviation Specialists, Global Reach: Experience the focused expertise and personal attention of dedicated charter specialists, supported by the operational strength and global network of the Rhenus Group. This partnership gives you specialist aviation knowledge with the resources to handle complex international operations seamlessly.

Proven Expertise in Demanding Operations:

Aircraft Knowledge

Our team understands the capabilities and operational characteristics of over 1,000 aircraft models worldwide. This knowledge helps select the most suitable, cost-effective aircraft for specific mission requirements, ensuring optimal performance for every journey.

Operational Experience

Three decades coordinating complex aviation operations gives our team the experience to handle challenging situations worldwide. From high-altitude airfields to remote locations, we coordinate every operational detail with the precision your mission demands.

Regulatory Expertise

Our team understands the capabilities and operational characteristics of over 1,000 aircraft models worldwide. This deep knowledge helps us select the most suitable and cost-effective aircraft for your specific mission requirements, ensuring optimal performance for every journey.

Established Track Record

With over 30 years specialising in air charter coordination, Fliteline has built a reputation for reliability and genuine expertise across diverse aviation challenges.

Key Sectors We Serve

Valuables
We coordinate secure transport for high-value cargo with absolute discretion and specialised handling that these sensitive shipments demand.

Music & Entertainment
Concert tours and film productions require precise timing and equipment coordination. We understand the unique logistics of live entertainment events.

Agricultural
Agricultural operations depend on precise timing. We coordinate charter solutions ensuring products and equipment reach destinations when timing matters.

Airlines
We support airline operations with crew positioning, maintenance flights, and operational support helping keep airline operations running smoothly.

NGO
Non-governmental organisations trust us with mission-critical operations, delivering aid to vulnerable populations through reliable aviation solutions.

Automotive
We support automotive manufacturers with reliable transport for vehicles and essential components when production schedules demand timely delivery.

Pharma
Pharmaceutical companies trust us for time-critical delivery of medical supplies and temperature-sensitive shipments maintaining product integrity.

Animals
Animal transport requires specialised knowledge and careful handling. We coordinate aviation solutions prioritising welfare and regulatory compliance.

Emergency Response
During crises, we provide rapid aviation solutions for disaster relief missions when standard logistics cannot meet urgent response requirements.

Government
Government agencies rely on us for secure, timely transport for diplomatic missions and official operations requiring complete operational discretion.

Current Events
Major international events require complex logistics coordination. We provide reliable transport solutions for conferences and special occasions.

Oil & Gas
Supporting energy sector operations means reaching remote locations under challenging conditions through reliable transport to offshore platforms.

Executive Travel
We provide personalised charter solutions for business leaders who value discretion, flexibility, and professional service over unnecessary luxury.

Sports
Sports organisations require precise coordination for teams, equipment, and supporters. We coordinate travel solutions focusing everyone on performance.

Evacuation & Repatriation
We coordinate secure evacuations and repatriations, providing safe passage for individuals facing crisis situations through expert coordination.

Incentive Travel
Corporate incentive programmes receive special attention to detail. We coordinate group experiences enhancing rewards through efficient coordination.

Travel Agents
We partner with travel professionals who face complex client requirements, providing reliable charter solutions helping deliver exceptional service.

Military
Our military charter experience ensures precision execution for defence operations understanding security requirements and operational demands.

Perishables
Time-sensitive cargo like fresh produce requires careful coordination. We specialise in maintaining product integrity throughout complex transport.

Medical
Medical emergencies require immediate aviation solutions. We coordinate rapid response for patient transport receiving our complete attention and care.

How Can We Help?

You've seen what we can achieve, and now you're probably wondering what it's actually like to work with aviation specialists who genuinely care about your journey's success. Here's exactly what happens when you choose Fliteline as your charter partner.

Working Together: What to Expect

You've seen what we can achieve, and now you're probably wondering what it's actually like to work with aviation specialists who genuinely care about your journey's success. Here's exactly what happens when you choose Fliteline as your charter partner.

1. Understanding Your Requirements

We start with a thorough discussion about your specific needs, timeline, and any challenges you're anticipating. This isn't about fitting you into standard solutions—it's about understanding exactly what success looks like for your situation.

2. Clear Recommendations

Within 24 hours, you'll receive detailed recommendations with aircraft options, transparent cost breakdowns, and our suggested approach. Everything explained clearly, with alternatives when they make sense for your requirements.

3. Careful Coordination

Once you're ready to proceed, your dedicated team coordinates every detail whilst our operations specialists provide round-the-clock support. You stay informed throughout, with proactive updates on progress and any adjustments needed.

4. Building Partnership

This is where lasting relationships begin. We learn from every operation, understanding your preferences better each time to provide even more effective solutions for future aviation requirements.
